Subject: FW: rush search authorization

Hi,

we just spoke on the phone about this rush search. what I need is a cross between SEQ ID NO: 1 for application 10/007,781 and Genbank Accession number NM_003247.1 The GI number is 4507486. (I got the cross with version 2- NM_003247.2, but I need a cross with the first version).

thanks,

PLEASE RUSH.

I Approve.

Please note that the request is for an alignment of the two sequences against one another, not a search of the database.

Thanks,

Jeff Fredman

they are both 5784 nucleotides long. I want to know if they are identical or not. I can't imagine that it would take very long to cross them?

Importance: High

Jeff,

could you please rush this search for me:

Please search SEQ ID NO: 1 from application 10/007,781 with
Genbank Accession number NM_003247

thanks,
